### World Health Day 2021

World Health Day is observed internationally on **April 7**. The day is sponsored by the World Health Organization (WHO), and every year a different global health issue is highlighted. The day also marks the anniversary of the WHO's founding and aims to remind people that health and access to healthcare are human rights. To celebrate the day, the

World Health Organization holds events and activities across the world, and at regional levels. From its inception at the First Health Assembly in 1948 and since taking effect in 1950, the celebration has aimed to create awareness of a specific health theme to highlight a priority area of concern for the World Health Organization. Over the past 50 years this has brought to light important health issues such as mental health, maternal and child care, and climate change. The celebration is marked by activities which extend beyond the day itself and serves as an opportunity to focus worldwide attention on these important aspects of global health.

The World Health Day theme for 2021 is "Building a fairer, healthier world", highlighting the fact that access to basic healthcare is still very unequal, and many people around the world still struggle to be treated for their health issues. Most World Health Day themes have been very effective at raising awareness and educating the public about the best actions to take to prevent and treat health issues and diseases, such as polio and infectious diseases, and encouraging people to exercise and get moving to improve their health. This is why World Health Day is such an important observance.

Another main goal of World Health Day is to make Universal Health Care a reality for everyone, meaning everyone will have fair access to the treatments they need. If you don't have such an event happening near you, the WHO provides information and toolkits for organizers. So you can take the initiative and start a conversation about health and healthcare in your community. Take this opportunity to educate yourself on health issues and crises happening around the world currently, and look into ways you can help. You could volunteer with a local health organization or at a hospital, or donate to medical research or funds that help make healthcare accessible to those who can't afford it.
