### **“Yoga: the Science of Holistic Health’**

Yoga is an ancient physical, mental and spiritual practice that originated in India. The word ‘yoga’ derives from Sanskrit and means to join or to unite, symbolizing the union of body and consciousness. Yoga is a powerful tool to deal with the stress of uncertainty and isolation, as well as to maintain physical well-being. Yoga is an in-depth, wholistic, science of man and indeed the only science that deals simultaneously with all aspects of the philosophy, psychology and practicality of conscious evolution. Yoga enables us to search the depths of our own self thus realising the ultimate truth of reality through an experiential model. Yoga is the best way for us to regain our birthrights and attain the goal of our human existence. Today it is practiced in various forms around the world and continues to grow in popularity.

The International Day of Yoga aims to raise awareness worldwide of the many benefits of practicing yoga. UNICEF says kids can practice many yoga poses without any risk and get the same benefits that adults do. These benefits include increased flexibility and fitness, mindfulness and relaxation. To live through this lockdown & pandemic period, yoga is the best thing to adopt as a lifestyle habit. During this Covid 19 pandemic yoga helps us build a strong physical, mental and spiritual health system by ancillary supporting therapy. When combined with breathing and meditation, it acts as the best element to take care of our mind, body and soul. There are different forms of yoga that can help us to stay physically strong and mentally balanced.
