**INDIAN JOURNAL OF NATUREL SCIENCES (IJONS)**  
**(BI-MONTHLY - PRINT)**

**POLICIES**

**OPEN ACCESS AND LICENSING**

Indian Journal of Natural Sciences is loyal to open access for academic/research work. All the original articles and review papers published in this journal are free to access immediately from the date of publication. We don't charge any fees for any reader to download articles and reviews for their own scholarly use. The Indian Journal of Natural Sciences also operates under the Creative Commons Licence CCBY- NC-ND 3.0 (Creative Commons Attribution-Non Commercial - No Derivs 3.0 Unported). This allows for the reproduction of articles, free of charge, for non-commercial use only and with the appropriate citation information. All authors publishing with the IJONS accept these as the terms of publication.

**ETHICS**

**Policies on Ethics, Conflict of Interest, Human and Animal Rights, and Informed Consent**

**Ethics**

The publication of an article in a peer-reviewed journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of the work of the authors and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behaviour for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer, the publisher and the society of society-owned or sponsored journals.

**Conflict of Interest**

Authors are required to disclose all sources of institutional, private and corporate financial support for their study. Donors of materials (for free or at a discount from current rates) should be named in the source of funding and their location (town, state/county, country) included. Other donors will be identified in the text. If no funding has been available other than that of the author's institution, this should be specified upon submission. Authors are also required to disclose any potential conflict of interest. These include financial interests (for example patent, ownership, stock ownership, consultancies, speaker's fee,) or provision of study materials by their manufacturer for free or at a discount from current rates. Author's conflict of interest (or information specifying the absence of conflicts of interest) and the sources of funding for the research will be published under a separate heading entitled "Conflict of Interest and Sources of Funding Statement". Any experiments involving animals must be demonstrated to be ethically acceptable and where relevant conform to national guidelines for animal usage in research.

**Human and Animal Rights**

Medicine, Radiology, Pathology and Surgery encourages authors submitting manuscripts reporting from a clinical trial to register the trials registries & bear a clinical trial registration number and name of the trial. Authors must state that the protocol for the research project has been approved by a suitably constituted Ethics Committee of the institution within which the work was undertaken and that it

conforms to the provisions of the Declaration of Helsinki. The Journal retains the right to reject any manuscript on the basis of unethical conduct of either human or animal studies. All investigations on human subjects must include a statement that the subject gave informed consent. Patient anonymity should be preserved. Photographs need to be cropped sufficiently to prevent human subjects being recognized or an eye bar should be used.

Reports of randomized clinical trials should present information on all major study elements, including the protocol, assignment of interventions (methods of randomization, concealment of allocation to treatment groups), and the method of masking (blinding), based on the CONSORT statement (Moher D, Schulz KF, Altman DG: The CONSORT Statement: Revised Recommendations for Improving the Quality of Reports of Parallel- Group Randomized Trials. Consent for Identifying Information if any identifying information is included in any part of the manuscript, you must obtain a written, informed consent from the patient and submit a copy of the document to the concerned Journal's Editorial Office.

### **PEER REVIEW (DOUBLE BLIND) POLICY**

We are committed to prompt evaluation and publication of fully accepted papers in IJONS. To maintain a high-quality publication, all submissions undergo a rigorous review process. Characteristics of the peer review process are as follows:

- Simultaneous submissions of the same manuscript to different journals will not be tolerated.
- Manuscripts with contents outside the scope will not be considered for review.
- Papers will be refereed by at least 2 experts as suggested by the editorial board.
- In addition, Editor(s) will have the option of seeking additional reviews when needed.  
Authors will be informed when Editor(s) decide further review is required.
- All publication decisions are made by the journal's Editor-in-Chief on the basis of the referees' reports.  
Authors of papers that are not accepted are notified promptly.
- All submitted manuscripts are treated as confidential documents. We expect our Board of Reviewing Editor(s) and reviewers to treat manuscripts as confidential material as well.
- Editor(s) and reviewers involved in the review process should disclose conflicts of interest resulting from direct competitive, collaborative, or other relationships with any of the authors, and remove oneself from cases in which such conflicts preclude an objective evaluation. Privileged information or ideas that are obtained through peer review must not be used for competitive gain.
- Our peer review process is confidential and identities of reviewers cannot be revealed.

### **PUBLICATION ETHICS AND MALPRACTICE STATEMENT**

#### **Section A: Publication and authorship**

All submitted papers are subject to strict peer-review process by at least two international reviewers that are experts in the area of the particular paper. Reviewers are being selected by Editor in Chief or the committee formed by Editor. Author also can propose reviewers for some journals and article types.

1. The factors that are taken into account in review are relevance, originality, readability, statistical validity and language.
2. The possible decisions include acceptance, minor revisions, major revision or rejection.

3. If authors are encouraged to revise and resubmit a submission, there is no guarantee that the revised submission will be accepted.
4. Rejected articles will not be re-reviewed.
5. The paper acceptance is constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism.
6. No research can be included in more than one publication, whether within the same journal or in another journal.

### **Section B: Authors' responsibilities**

1. Authors must certify that their manuscript is their original work.
2. Authors must certify that the manuscript has not previously been published elsewhere, or even submitted and been in reviewed in another journal.
3. Authors must participate in the peer review process and follow the comments.
4. Authors are obliged to provide retractions or corrections of mistakes.
5. All Authors mentioned in the paper must have significantly contributed to the research.
6. Level of their contribution also must be defined in the "Authors' Contributions" section of the article.
7. Authors must state that all data in the paper are real and authentic.
8. Authors must notify the Editors of any conflicts of interest.
9. Authors must identify all sources used in the creation of their manuscript.
10. Authors must report any errors they discover in their published paper to the Editors.
11. Authors must not use irrelevant sources that may help other researches/journals.
12. Authors cannot withdraw their articles within the review process or after submission, or they must pay the penalty defined by the publisher.

### **Section C: Peer review/responsibility for the reviewers**

1. Reviewers should keep all information regarding papers confidential and treat them as privileged information.
2. Reviews should be conducted objectively, with no personal criticism of the author. No self-knowledge of the author(s) must affect their comments and decision.
3. Reviewers should express their views clearly with supporting arguments in 500 to 1000 words.
4. Reviewers may identify relevant published work that has not been cited by the authors.
5. Reviewers should also call to the Editor in Chief's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.
6. Reviewers should not review manuscripts in which they have conflicts of interest
7. resulting from competitive, collaborative, or other relationships or connections with
8. any of the authors, companies, or institutions connected to the papers.

### **Section D: Editorial responsibilities**

1. Editors (Associate Editors or Editor in Chief) have complete responsibility and authority to reject/accept an article.
2. Editors are responsible for the contents and overall quality of the publication.
3. Editors should always consider the needs of the authors and the readers when attempting to improve the publication.
4. Editors should guarantee the quality of the papers and the integrity of the academic record.
5. Editors should publish errata pages or make corrections when needed.
6. Editors should have a clear picture of a research's funding sources.
7. Editors should base their decisions solely on the papers' importance, originality, clarity and relevance to publication's scope.
8. Editors should not reverse their decisions nor overturn the ones of previous editors without serious reason.

9. Editors should preserve the anonymity of reviewers (in half blind peer review journals). Editors should ensure that all research material they publish conforms to international accepted ethical guidelines.
10. Editors should only accept a paper when reasonably certain.
11. Editors should act if they suspect misconduct, whether a paper is published or
12. unpublished, and make all reasonable attempts to persist in obtaining a resolution to the problem.
13. Editors should not reject papers based on suspicions; they should have proof of misconduct.
14. Editors should not allow any conflicts of interest between staff, authors, reviewers and board members.
15. Editors must not change their decision after submitting a decision (especially after reject or accept) unless they have a serious reason.

### **Section E: Publishing Ethics Issues**

1. All editorial members, reviewers and authors must confirm and obey rules defined by COPE.
2. Corresponding author is the main owner of the article so she/he can withdraw the article when it is incomplete (before entering the review process or when a revision is asked for).
3. Authors cannot make major changes in the article after acceptance without a serious reason.
4. All editorial members and authors must will to publish any kind of corrections honestly and completely.
5. Any notes of plagiarism, fraudulent data or any other kinds of fraud must be reported completely to COPE.

## **ANTI-PLAGIARISM POLICY**

**Indian Journal of Natural Sciences (IJONS)** regards plagiarism as a very serious offence. It is an illegal form of copying. Plagiarism is defined as the unacknowledged use of the work of others as if this were your own original work.

### **Examples of plagiarism**

- Copying and pasting from the Internet and posting somewhere else without proper citation
- Putting your name on another person's essay or project
- Copying exact wording from another person's text
- Using another person's photo, diagram, tables, sounds, or ideas without proper Citation
- Presenting research in your own words without providing references
- Purchasing another person's text and using it as your own
- Presenting ideas in the same format and order as your research source

### **By submitting paper for publication to the journal, Author(s) certify that:**

- I/We are fully aware that plagiarism is wrong
- I/We know that plagiarism is the use of another person's idea or published work and to pretend that it is one's own.
- I/ We declare that each contribution to your project from the work(s) of other peoples published works or unpublished sources have been acknowledged and source of information have been referenced.
- I/We certify that you are solely responsible for any incomplete reference that may remain in my/our work.

### **Anti-plagiarism declaration**

I have read and understood the IJONS rules on plagiarism. I hereby declare that this piece of written work is the result of my own independent scholarly work, and that in all cases material from the work of others (in books, articles, essays, dissertations, and on the internet) is acknowledged, and quotations and

paraphrases are clearly indicated. No material other than that listed has been used. This written work has not previously or not yet been published.

### **Tips for Avoiding Plagiarism**

- Learn the citation expectations for each course.
- When you take notes for a paper, be sure to cite sources so you don't get mixed up later.
- When you research online, be sure to find the original source of the information (Many Websites Plagiarize).
- If you are really worried, ask your prof. if you can submit a rough draft so she /he can check your citations.
- When in doubt, cite! It is better to have too many citations than few.

### **AI GENERATED CONTENT POLICY**

Indian Journal of Natural Sciences (IJONS) has an exacting policy on AI generated content in research manuscripts. Authors are instructed to ensure that the research manuscript which would submit for the publication should be unique and innovative. The publishers and editors are not responsible for any abuse and it is clearly announced that authors are fully responsible for their manuscript.

Authors are insisted to disclose the use of artificial intelligence (AI) tools in the preparation of manuscript. It should not be in the form of AI generated and assisted text, images, tables, graphs, data interpretation and language modifications. Failure to disclose AI assisted content will be deemed a violation of research ethics and your manuscript will not be considered for publication. The Journal does not validate the usage of AI contents in the manuscript and if the AI content would be identified in the manuscript, the authors are sole responsibility. It is informed that the AI tool will not be accepted as an author and it is clearly stated that authorship must be given only to the human contributors. All authors in the manuscript are insisted to acknowledge their involvement in the preparation of manuscript. The corresponding author must ensure that no AI generated contents in the manuscript and it is not represented for human work.

It is clearly instructed that the publisher and editorial board are not responsible for AI generated content in submitted manuscripts. The full responsibility of the corresponding author is to ensure that AI generated content does not include in factual inaccuracies, Biases, Plagiarism and data manipulation. Authors are sole responsible for any errors or misinformation arising from AI assistance. Indian Journal of Natural Sciences will not accept AI errors and it will be considered as an ethical violations.

#### **Immediate withdrawal**

If the manuscript is detected to hold undisclosed or unethical AI generated content, it will be immediately removed from the journal website, without any reconsideration.

#### **Author Suspension**

The authors are strictly instructed that if the violation of AI content will be found in the manuscript and it would be barred from publishing in the journal for one year. During this period, they will not be permitted to submit any manuscripts.

#### **Permanent Black listing of authors**

Repeated violations will results in permanent blacklisting for the authors from submitting manuscripts to IJONS.

## **Editorial: "Living Space: Humanity's Next Frontier"**

*The goal of success has always been to touch the sky. Primitive man wanted to know the secrets of the sky. Stories about the billions of stars appearing in the night sky kept arising in him. The nighttime glow fascinated him. He carved what he saw into paintings on rocks. Thus, the science of primitive man began simply by observing and admiring the sky. He studied the constellations and enjoyed naming each group after animals he saw in the forests. Man's mind was racing to reach the stars and planets that were unreachable. Its longing continues to this day.*

*As a result, our space telescopes are currently exploring the constellations of various star families beyond the solar system. Man, who has been exploring the secrets of the sky against the backdrop of science, now stands in awe of its boundless expanse. The UN General Assembly, through resolution 54/68 on December 6, 1999, proclaimed World Space Week (WSW) to celebrate the contribution of space science and technology to the advancement of the human condition. World Space Week (October 4-10) is the world's largest annual space event. It helps to inspire students and develop the researchers and personnel for tomorrow's space program. World Space Week events serve to foster international cooperation in space communication and education, and to educate the public about space activities. Each year, a theme is selected by the World Space Week Association Board of Directors. The theme for 2025 is "Living in Space". The theme explores humanity's journey to make space a habitable place, highlighting innovative technologies, challenges, and collaborative efforts to realize this vision.*

*For decades, space was the final frontier, the realm of satellites, astronauts, and telescopes peering into the unknown. But today, the idea of **living in space** is no longer a distant dream. From NASA's Artemis missions to SpaceX's interplanetary ambitions, the global effort is clear. **India, too, has emerged as a pioneering force**, transforming itself from a humble spacefaring nation to a global leader in cost-effective, high-impact missions. In recent years, the **Indian Space Research Organisation (ISRO)** has captured the world's attention with missions that combine scientific brilliance with budgetary discipline. The success of **Chandrayaan-3** in 2023, which made India the first nation to land near the Moon's south pole, stands as a proud symbol of indigenous innovation and determination. The rover, Pragyan, not only conducted vital lunar experiments but also proved that **India's space dreams are grounded in reality**. The earlier **Mangalyaan (Mars Orbiter Mission)** in 2014 was another testament to India's ingenuity. Achieved at a fraction of the cost of other Mars missions, it made India the first Asian country to reach Martian orbit and the only one to do so successfully on its maiden attempt.*

*Looking ahead, ISRO's ambitious **Gaganyaan mission**, which aims to send Indian astronauts into space, will mark a historic moment — our first steps toward **living and working in space as a nation**. With growing collaborations in space science, the development of space habitats, and a focus on space-based solutions for agriculture, weather, and communication, India is not just participating in space exploration — **it is shaping the future of "living space" itself**.*

Yet "living space" holds dual meaning. It speaks not only to habitats beyond Earth, but also to how we live within the limited space of our own planet. Climate change, overpopulation, and resource scarcity force us to rethink how we design and share our living spaces. In this light, space exploration becomes more than a scientific endeavor; it is a mirror reflecting our responsibilities on Earth. Technologies developed for life in space — from closed-loop life support systems to sustainable energy solutions — are increasingly influencing how we address Earth's challenges. As India develops green propulsion systems and builds satellites to monitor environmental changes, **space becomes a tool for Earth's survival, not just our escape.**

As we celebrate **World Space Week 2025**, let us not be content with marveling at the stars. Let us prepare — not only technologically, but ethically and environmentally — for the era of living space. Let this be a time to dream boldly, act wisely, and build a future where space is not just where we go, but where we belong. The theme of "Living in Space" is promoted at World Space Week events through activities ranging from educational workshops, interactive sessions, panel discussions and collaborative projects with younger generations and public. All of these aim to foster innovative environmental solutions and humanities.
